Africa's AI & Digital Transformation Company

WEBSITE TRANSFORMATION BRIEF

Complete Developer Instructions — nextafrica.ai

Prepared by	Hudson Timothy Tumusiime, Founder & CEO
Website	nextafrica.ai
Date	May 2026
Version	1.0 — Full Production Build
Priority	URGENT — deliver Phase 1 before 28 May 2026

This document is the single authoritative source of truth for all changes to be made to the NEXT website. It covers every page, every section, every line of copy, every image slot, and every technical fix. Read it completely before starting work. Work through it section by section.

1. Critical Fixes — Do These First

These items must be fixed before any other work begins. They are breaking the site right now.

1.1 JavaScript Bundle Error

BUG — Site-Wide JS Error

The browser console shows a JavaScript bundle error on every page load. This is breaking interactive functionality across the entire site. Identify the broken import or build error in the JS bundle, fix it, and confirm the console is clean on all pages before proceeding.

1.2 Wrong Contact Details in Footer

The footer currently shows incorrect contact information. Replace with the following:

Email (CHANGE FROM)

hello@nexttransform.africa

Email (CHANGE TO)

hello@nextafrica.ai

Phone (CHANGE FROM)

+256 700 000 000

Phone (CHANGE TO)

+256 706 028 899

Website shown in footer

nextafrica.ai (confirm this is correct)

1.3 Remove All Fake Impact Statistics

CRITICAL — Remove Immediately

The homepage currently shows statistics that are not real: "50+ Organisations Transformed", "500+ Professionals Trained", "100+ Systems Deployed", "5 Countries Reached". These numbers are fabricated and damage NEXT's credibility. Remove the entire stats bar section completely. Do not replace with other numbers. The section should simply not exist until real data is available.

1.4 Navigation Links Audit

Check all navigation links and anchor links across the site. Confirm every link resolves correctly. Fix any 404s or broken anchors. The site uses anchor-based routing (#what, #who, #work, etc.) — ensure these all scroll to the correct sections.

2. Global Changes — Apply Across All Pages

2.1 Brand Colours

These are the only colours to use across the site. Do not deviate from this palette.

Deep Space Purple (primary background)	#140035
Electric Mint (accent, CTAs, highlights)	#00FC8F
Deep Emerald (secondary green)	#1B9B6F
Warm Gold (premium accents)	#FFB400
Pure White (text on dark)	#FFFFFF
Off-White / Light Purple (body text backgrounds)	#F8F6FF

2.2 Typography

Primary headings	Big Shoulders Display or similar — bold, impactful, wide tracking
Body text	Inter or similar — clean, modern sans-serif
Mono/technical text	DM Mono or similar

2.3 CTA Button Style

All primary CTA buttons across the site should be:

- Background: Electric Mint (#00FC8F)
- Text: Deep Space Purple (#140035) — dark text on mint
- Border-radius: 4–6px (slightly rounded, not pill-shaped)
- Font: bold, uppercase, slight letter-spacing

- Hover: slightly brighter mint with subtle upward shift

2.4 Footer — Final Correct Version

The footer should contain exactly the following:

- Logo (NEXT wordmark) — top left
- Tagline: "Africa's AI & Digital Transformation Company"
- Navigation links: Home | What We Do | Who We Serve | About | Contact
- Email: hello@nextafrica.ai
- Phone: +256 706 028 899
- Location: Kampala, Uganda
- Website: nextafrica.ai
- Copyright line: "© 2026 NEXT Africa. All rights reserved."
- NO social media icons unless accounts are active and confirmed

2.5 Meta / SEO

Ensure the following meta data is set correctly:

Title tag	NEXT Africa — AI & Digital Transformation Company
Meta description	NEXT helps African organisations modernise through AI systems, automation, and digital transformation. Based in Kampala, Uganda.
OG Image	Use the NEXT logo on Deep Space Purple background — 1200x630px
Canonical URL	https://nextafrica.ai

3. Homepage — Complete Rebuild Instructions

The homepage is the most important page. Every section below must match these instructions exactly.

3.1 Hero Section

SECTION: HERO

Copy — Keep as Is (Already Strong)

The current hero headline and subheadline are good. Keep them:

HEADLINE (keep)

We Don't Just Digitalise — We Transform

SUBHEADLINE (keep)

NEXT builds intelligent systems, automates operations, and prepares African organisations for the AI era. We don't install software. We rewire how organisations think and work.

CTA Buttons

Primary button

Start Your Transformation — links to /contact

Secondary button

See What We Do — scrolls to #services section

Hero Visual — Replace Current Placeholder

The hero needs a powerful background or split-panel image. Use Envato Elements.

Envato Elements Search Terms for Hero

Search: "Africa technology business futuristic" Search: "digital transformation Africa professionals" Search: "African business team technology modern office" What to look for: A high-quality image or short looping video showing African professionals in a modern, technology-focused environment. The image should feel premium, futuristic, and confident. NOT stereotypical rural Africa. Think: glass-and-steel offices, people looking at screens, collaborative modern workspace. If using video: use a short 5-10 second loop as the hero background. Overlay with a dark purple gradient (opacity 60-70%) to ensure text is readable. If using image: choose a landscape-format photo. Apply a gradient overlay from #140035 at 80% opacity on the left side fading to 40% on the right.

3.2 What We Do — Service Cards Section

SECTION: SERVICES

Section Headline

HEADLINE

What We Do

SUBHEADLINE

Six core capabilities. One integrated mission: bringing African organisations into the intelligent era.

The 6 Service Cards — Copy for Each

Each card needs: Icon, Title, and a 2-sentence description. Use the copy below exactly.

Card 1: AI Strategy & Implementation

We design and deploy AI systems tailored to your organisation's specific operations — from document automation to intelligent decision support. You get a working system, not a presentation.

Card 2: Automation & Digital Workflows

We map your manual processes and rebuild them as automated workflows that run without constant human intervention. Less chaos. More capacity.

Card 3: Digital Operating Systems

We build custom internal platforms — dashboards, portals, CRMs, and management systems — that give your organisation a digital backbone. Your team works smarter. Your leaders see clearly.

Card 4: AI Training & Capacity Building

We train your team to understand, use, and champion AI tools in their daily work. From executives to front-line staff, we build internal AI confidence across your organisation.

Card 5: Communications & Digital Strategy

We help organisations communicate more powerfully in the digital age — building websites, content systems, and media strategies that amplify their mission. Your story, told with precision.

Card 6: Organisational Transformation

We partner with organisations navigating major change — restructuring, scaling, or modernising — to build the systems, culture, and digital infrastructure transformation requires.

Service Card Images — Envato Elements

Envato Search for Service Card Icons / Illustrations

Option A — Use illustrated icons (SVG or PNG): Search: "AI technology icons set", "digital transformation icons", "automation workflow icons" Option B — Use photography thumbnails: Card 1 (AI Strategy): Search "artificial intelligence business strategy Africa" Card 2 (Automation): Search "workflow automation technology business" Card 3 (Digital Systems): Search "dashboard digital platform business team" Card 4 (Training): Search "corporate training technology workshop Africa" Card 5 (Communications): Search "digital media communications strategy team" Card 6 (Transformation): Search "organisational change leadership business Africa" Style note: If using photos, make them consistent — same crop ratio, same colour treatment (dark overlay with mint tint). All images must feel premium and African-context.

3.3 How We Work — Process Section

SECTION: PROCESS

Section Headline

HEADLINE

How We Work

SUBHEADLINE

We don't drop software and disappear. Every engagement follows a structured methodology designed for African organisations — built for reality, not just theory.

4-Step Process — Copy

Step 1: Discover

We spend time understanding your organisation — how it operates, where it struggles, and what transformation would actually mean for your people. We listen before we prescribe.

Step 2: Design

We design a custom solution architecture — the systems, workflows, and digital tools your organisation needs. Everything is built for your context, your team, and your budget.

Step 3: Deploy

We build and implement the solution with your team in the room. No black-box handoffs. Your people understand what is being built and why.

Step 4: Develop

We stay with you. Training, iteration, support, and evolution — because transformation is not a project. It is a journey. We are your long-term partner.

3.4 Who We Serve — Sector Cards

SECTION: WHO WE SERVE

Section Headline

HEADLINE

Who We Serve

SUBHEADLINE

We work with organisations that are serious about transformation — and ready to invest in systems that last.

Sector Cards Copy

NGOs & Development Organisations

You carry critical missions with limited resources. We help you build operational systems that extend your capacity, improve reporting, and reduce the administrative burden that distracts from impact.

Schools & Universities

Education institutions in Africa are under pressure to modernise. We help you build digital systems for administration, communication, and learning — so your institution is ready for the future.

Government & Public Sector

We work with government bodies and public institutions to digitise services, automate reporting, and build the internal systems that citizens deserve.

Churches & Faith Organisations

Faith organisations are often the most influential in communities — but among the least digitised. We help you build systems for communication, membership, operations, and media that reflect the scale of your influence.

Corporate & Enterprise

Growing African businesses need digital infrastructure that scales. We build the internal systems, automation, and AI tools that let you grow without proportionally growing your headcount.

Startups & Entrepreneurs

Early-stage ventures need lean, smart systems from day one. We help you build digital operations that punch above your weight.

Who We Serve Images — Envato Elements

Envato Search per Sector Card

NGOs: Search "nonprofit teamwork Africa community development" Schools: Search "African students technology classroom modern education" Government: Search "government office digital services Africa" Churches: Search "African church community leadership congregation" Corporate: Search "African business professionals boardroom meeting" Startups: Search "African entrepreneurs startup team modern office" Style: All images should be warm, human, and contextually African. Consistent crop (landscape 3:2 or 4:3). Apply a subtle purple-to-transparent gradient overlay to unify them visually.

3.5 AI Training Programme Banner

SECTION: TRAINING CTA

HEADLINE

Train Your Team for the AI Era

SUBHEADLINE

Our AI capacity-building programmes are designed for African organisations. Practical. Relevant. Transformative. Whether you're training executives or entire departments — we build real AI fluency.

CTA Button

Learn About Our Training — links to /training page (to be created)

Background: Use a dark section — Deep Space Purple or a gradient from Purple to Deep Emerald. Add a subtle geometric pattern overlay. This section should feel premium and bold.

3.6 Main Call to Action Section

SECTION: MAIN CTA

HEADLINE

Ready to Transform Your Organisation?

SUBHEADLINE

Transformation starts with a conversation. Tell us where you are, where you want to go, and we will build the path together.

Primary CTA Button

Book a Free Discovery Call — links to /contact

Secondary link

Read our story — links to /about

4. About Page — New Page, Full Content

This page does not exist yet. It must be created as a dedicated route: /about. This page is critical for trust and relationship-building. It contains the founder story, company vision, and the team section.

4.1 Page Hero

HEADLINE

About NEXT

SUBHEADLINE

We are not a technology vendor. We are a transformation partner — built by Africans, for African organisations navigating the most important digital shift of our generation.

Background: Same dark hero treatment as homepage. Use an image of Kampala or an African city skyline at dusk with a Deep Space Purple overlay.

Envato Search for About Hero

Search: "Kampala Uganda skyline city" Search: "African city modern skyline technology"
Search: "Nairobi Kampala Lagos city night lights" Alternatively: A portrait photo of Hudson Timothy Tumusiime as the hero image (if professional photography is available).

4.2 Company Story Section

SECTION HEADLINE

Why NEXT Exists

Use the copy below. Do not paraphrase or shorten. This is the authoritative version.

COPY — Company Story

Africa is not behind. Africa is at the beginning. The organisations, churches, schools, and businesses building this continent right now are doing transformational work — but most of them are still running on spreadsheets, WhatsApp groups, and manual systems that were never built for the scale of their ambition. NEXT was built to change that. We exist to help African organisations close the gap — not by copying what the West built twenty years ago, but by leaping forward into intelligent, AI-powered systems designed for our context, our culture, and our future. We are not evangelists for technology. We are builders of real systems. Practical. Purposeful. African-first. This is not the story of technology coming to save Africa. It is the story of Africa building its own digital future — and NEXT is part of how that happens.

4.3 Founder Section — Hudson Timothy Tumusiime

Layout Instructions

This section should be a two-column layout: photo on the left, text on the right. The photo should be a professional headshot or portrait of Hudson. On mobile, the photo stacks above the text.

Photo Direction

Founder Photo

Use a professional photo of Hudson Timothy Tumusiime — ideally a headshot or three-quarter portrait. The photo should:

- Be taken against a clean, professional background (dark preferred)
- Show Hudson in business or smart-casual attire
- Be warm and approachable but commanding
- Minimum resolution: 600x800px

If no photo is available yet: use a placeholder with a Deep Space Purple background and the NEXT 'N' watermark until a real photo is provided.

Founder Copy — Use This Exactly

SECTION LABEL

Founder & CEO

NAME

Hudson Timothy Tumusiime

COPY — Founder Story

Hudson Timothy Tumusiime has spent his career at the intersection of communication, technology, and mission. As founder and CEO of NEXT, he is building Africa's leading AI and digital transformation company — one that doesn't just consult, but builds real systems that change how organisations operate. He is also the founder and CEO of Charis Creations, a media production and communications company that has worked with some of Uganda's most influential organisations, churches, and brands. Through that work, he saw the same gap everywhere: powerful organisations running on broken systems. NEXT was born from that frustration — and from the belief that African organisations deserve world-class digital infrastructure. Hudson also serves as Communications Director for Fathers Arise under The Remnant Generation, where he applies the same strategic communication principles he brings to all his work: clarity, systems, and storytelling that moves people to action. He is based in Kampala, Uganda — and he is building for the long term.

4.4 Our Values Section

SECTION HEADLINE

What We Believe

Display as a 3-column or 2-column grid of value cards.

African-First

Everything we build is designed for African organisations, African infrastructure, and African realities. We do not import foreign solutions. We build for context.

Systems, Not Shortcuts

We do not believe in quick fixes. We believe in building proper foundations — systems that will serve your organisation for years, not months.

Partnership, Not Delivery

We are not vendors. We are partners. We stay engaged, we train your team, and we grow with you. Our success is measured by your transformation.

Honesty Over Hype

We will tell you what you need — not just what you want to hear. We do not over-promise. We under-promise and over-deliver.

Excellence Without Apology

We hold ourselves to a global standard of quality. African organisations deserve world-class systems. We build nothing less.

Impact at Scale

We are not building a lifestyle business. We are building a company that will transform how African institutions operate — at continental scale.

4.5 About Page CTA

HEADLINE

Let's Build Something That Lasts

SUBHEADLINE

If your organisation is ready to stop managing chaos and start building systems that work — we

are ready to partner with you.

CTA Button

Start the Conversation — links to /contact

5. What We Do Page — Updates

This page exists already at /what (or #what). The following changes need to be made.

5.1 Page Hero Update

HEADLINE (update to)

What We Do

SUBHEADLINE (update to)

We build AI systems, digital platforms, and intelligent workflows that change how African organisations operate. Not theory. Real infrastructure.

5.2 Service Detail Sections

Each of the 6 services listed in Section 3.2 of this brief should have its own expanded section on this page. Use the same copy from Section 3.2, but expand each service with the following additions:

Add to each service:

- Who it is for: (1 sentence naming the type of organisation)
- What you get: (3-4 bullet points of deliverables)
- How long it takes: (estimated timeline)

Note: The development team should draft these additions based on the service descriptions in Section 3.2 above, then submit them to Hudson for approval before publishing.

5.3 Page CTA

HEADLINE

Which of these is your biggest need right now?

CTA Button

Talk to Us — links to /contact

6. Who We Serve Page — Updates

This page exists already. Use the sector descriptions from Section 3.4 of this brief. Each sector card should expand into a full section with:

- The sector name as the section heading
- The sector description (from Section 3.4)
- A "Common Challenges We Solve" subsection with 3 bullet points of typical pain points for that sector
- An image relevant to that sector (Envato search terms in Section 3.4)

6.1 Page CTA

HEADLINE Work With Us
SUBHEADLINE Whether you are an NGO in Kampala, a university in Nairobi, or an enterprise in Lagos — if you are ready to transform, we are ready to build.
CTA Button Book a Discovery Call — links to /contact

7. New Pages to Create

7.1 Contact Page — /contact

**PRIORITY: HIGH —
CREATE NOW**

Page Layout

Two-column layout: contact form on the left, contact info on the right.

Page Headline

HEADLINE

Let's Start the Conversation

SUBHEADLINE

Tell us about your organisation and what you're trying to build. We'll respond within 24 hours.

Contact Form Fields

1. Full Name (required)
2. Organisation Name (required)
3. Email Address (required)
4. Phone Number (optional)
5. Country (required — dropdown)
6. Type of Organisation (required — dropdown: NGO / School / Government / Church / Corporate / Startup / Other)
7. What's your biggest challenge right now? (required — text area, min 50 chars)
8. How did you hear about NEXT? (optional — dropdown)

Submit Button

Button Text

Send Message — I'll respond within 24 hours

Contact Information Panel (right side)

- Email: hello@nextafrica.ai
- Phone: +256 706 028 899

- Location: Kampala, Uganda
- Hours: Monday – Friday, 8am – 6pm EAT

Trust Signal Below Form

Copy

"We respond to every serious enquiry within 24 hours. No automated sequences. No sales scripts. A real conversation with someone who can actually help."

7.2 Training Page — /training

**PRIORITY: HIGH —
CREATE NOW**

HEADLINE

AI Training Programmes

SUBHEADLINE

We build AI fluency inside African organisations. Not abstract concepts — real skills your team can apply on Monday morning.

Programme Types

Executive AI Briefing (1 Day)

For: C-Suite, Board Members, Senior Leaders. Purpose: Understand what AI actually is, what it can do for your organisation, and how to lead an AI transformation. Format: Workshop + Q&A.

Team AI Foundations (3 Days)

For: Department heads, managers, and team leads. Purpose: Practical AI literacy — tools, workflows, and use cases relevant to your sector. Format: Hands-on training with real tools.

Custom Organisational Programme

For: Entire organisations requiring full AI transformation readiness. Purpose: Custom curriculum built around your specific tools, workflows, and goals. Format: Multi-week programme with ongoing support.

Training Page CTA

CTA Button

Apply for Training — links to /contact

Training Page Image

Envato Search

Search: "corporate training workshop Africa technology" Search: "professional development seminar Africa modern" Search: "business team learning digital skills" Choose: An image showing engaged African professionals in a training environment. Modern, well-lit, energetic.

7.3 Case Studies / Work Page — /work

**PRIORITY: MEDIUM —
BUILD WHEN READY**

This page will showcase NEXT's completed projects. For now, create the page structure with placeholder content that says:

PLACEHOLDER COPY

"Our work speaks for itself — but only when we have permission to share it. Case studies coming soon as our partners allow us to publish their transformation stories."

When real case studies are available, each case study card should include:

- Organisation name (or anonymised sector if confidential)
- The challenge they faced
- What NEXT built
- The outcome / result
- One testimonial quote if available

8. Media Guide — Envato Elements

NEXT has an active Envato Elements subscription. All photography and video should be sourced from here. This section gives exact guidance on what to look for on each section of the site.

Envato Elements URL

elements.envato.com — log in with NEXT credentials

8.1 Photography Style Guide

Every image used on the site must meet these standards:

- African context preferred — if the subject is people, they should be African or the setting should be recognisably African
- High resolution — minimum 2000px wide for full-width images, 800px for card images
- Modern, premium feel — no outdated stock photo aesthetics, no cheesy poses
- Consistent colour temperature — warm to neutral (not cold/blue-tinted)
- Leave visual space for text overlay where needed (especially hero images)

8.2 Section-by-Section Image Guide

Homepage Hero

Search: "Africa technology business futuristic" or "digital transformation Africa professionals" — 1 wide landscape image or short video loop

Service Cards (x6)

Individual searches per service — see Section 3.2 of this brief. Square or 4:3 landscape crops. Consistent treatment.

Who We Serve (x6)

Individual searches per sector — see Section 3.4 of this brief. 3:2 landscape crops.

About Hero

Search: "Kampala Uganda" or "African city skyline evening" — 1 wide landscape

Founder Section

Hudson's professional portrait — NOT from Envato. This must be a real photo of Hudson.

Training Page Hero

Search: "corporate training Africa technology workshop" — 1 wide landscape

Contact Page

Search: "professional conversation business Africa modern office" — 1 portrait or square

8.3 Video Guide (Homepage Hero)

If using a background video on the homepage hero:

- Search Envato: "technology data Africa futuristic loop" or "city Africa night timelapse"
- File format: MP4, H.264
- Duration: 6–15 seconds, seamless loop
- Resolution: 1920x1080 minimum
- Apply a Deep Space Purple gradient overlay at 60-70% opacity over the video
- Ensure text remains readable — test on multiple screen sizes
- Add a static image fallback for mobile devices

9. Technical Requirements

9.1 Performance

- Page load time: under 3 seconds on a standard 4G connection
- Compress all images — use WebP format where possible, with PNG/JPG fallback
- Lazy-load all images below the fold
- Minify CSS and JS bundles
- Google PageSpeed score: target 80+ on mobile, 90+ on desktop

9.2 Mobile Responsiveness

- Site must be fully responsive on all screen sizes: 320px minimum width to 2560px wide
- Test on: iPhone SE (375px), iPhone 14 (390px), iPad (768px), iPad Pro (1024px), Desktop (1440px)
- Navigation: hamburger menu on mobile, full nav on desktop
- All CTA buttons must be thumb-friendly on mobile (minimum 44x44px tap target)

9.3 Forms

- Contact form must send email notifications to: hello@nextafrica.ai
- Form submissions must include: timestamp, all field values, and sender IP country
- Show a success message on submission: "Thank you. Hudson will be in touch within 24 hours."
- Validate all required fields client-side before submission
- Protect form with spam prevention (honeypot field or similar — NOT Google reCAPTCHA as it is blocked in some African networks)

9.4 Browser Support

- Chrome (latest 2 versions)
- Firefox (latest 2 versions)
- Safari (latest 2 versions)
- Edge (latest 2 versions)
- Mobile Chrome and Safari

9.5 Analytics

- Install Google Analytics 4 (or Plausible for a privacy-friendly alternative)
- Track: page views, CTA button clicks, form submissions, scroll depth on homepage
- Set up goals: Contact form submission = primary conversion

10. Delivery Phases

Work must be delivered in two phases. Phase 1 is urgent.

Phase 1 — URGENT (Complete Before 28 May 2026)

DEADLINE

28 May 2026 — before the Kenya National Prayer Breakfast (Parliament of Kenya, Nairobi). Hudson will be presenting NEXT to senior African leaders at this event. The site must be live and perfect.

9. Fix JS bundle error — console must be clean
10. Update all contact details (email, phone) throughout the site
11. Remove the fake statistics bar from the homepage
12. Update homepage hero — new image/video
13. Update footer with correct contact details and copyright
14. Create /contact page with working form
15. Create /about page with founder story and company narrative
16. Update homepage copy per Section 3 of this brief
17. Meta/SEO updates (title, description, OG image)
18. Full mobile responsive check
19. Deploy to production at nextafrica.ai

Phase 2 — Post-Nairobi (Complete by 15 June 2026)

20. Create /training page
21. Create /work (case studies) page — placeholder version
22. Expand What We Do page with full service detail sections
23. Expand Who We Serve page with sector challenges
24. Implement analytics tracking
25. Performance optimisation
26. Full cross-browser QA test

11. Approval & Handoff

11.1 Review Process

Before any page goes live, Hudson must review and approve:

27. Share a staging link for each completed page
28. Hudson will review on both desktop and mobile
29. Feedback will be given within 48 hours
30. Maximum two rounds of revisions per page
31. Only after explicit written approval should pages go to production

11.2 Communication

Primary contact

Hudson Timothy Tumusiime

Email

hudson@nextafrica.ai

Phone / WhatsApp

+256 706 028 899

Response expectation

Hudson will respond within 24 hours on business days

11.3 Final Handoff Checklist

Before marking the project complete, confirm all of the following:

- All Phase 1 items delivered and live
- Contact form tested and sending email to hello@nextafrica.ai
- All copy matches this brief exactly
- All fake statistics removed
- Correct phone and email everywhere
- No JS console errors
- Site loads in under 3 seconds on mobile
- All pages reviewed and approved by Hudson
- Source code delivered and accessible

End of Brief.

This document was prepared for the NEXT Africa website developer. All content, copy, and strategic direction is the intellectual property of NEXT Africa and Hudson Timothy Tumusiime. Do not share outside the development team.

Document prepared by	Hudson Timothy Tumusiime, Founder & CEO, NEXT Africa
Version	1.0 — May 2026
